

AMG4787AR-DR-SF Instruction Manual

8 Channel Video Receive Unit with 8 Bi-directional Data and Audio Channels plus Dual Redundant Operation

The **AMG4788AR-DR-SF** is a rackmount eight channel video receive unit designed to receive 8 video signals and transmit and receive up to 8 data or audio signals over two Singlemode fibres with Dual Redundant operation. The 8 data/audio channel interfaces, whether RS232, RS422, RS485, 20mA, TTL, Contact Closure, Lonworks or Audio, are defined at manufacture by the addition of daughter boards fitted onto the Data Expansion Board A.

The **AMG4788AR-DR-SF** is designed to plug into an AMG2009 or AMG2015 subrack, which in turn fits into a 19" rack system.

The AMG4788AR-DR-SF is designed to operate with AMG4787A-DR-SF or rackmount equivalent AMG4787AR-DR-SF eight channel video transmit unit in a point to point configuration.

Introduction

Unit Functional Schematic

The AMG4788AR-DR-SF receives up to 8 video and 8 data signals from the AMG4787A-DR-SF.

It also transmits 8 data signals to the **AMG4787A-DR-SF**.

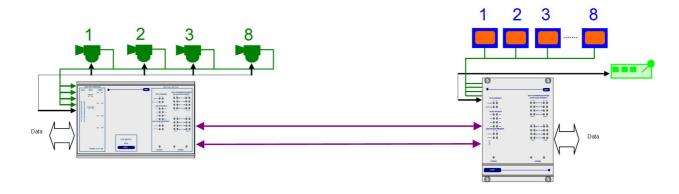

The **AMG4787A-DR-SF** transmits and receives the optical signals from both primary and secondary optical channels. These optical channels are transmitted on the same optical fibre in opposite directions, operating at different wavelengths. The primary channel operates on 1550nm and the secondary channel on 1310nm.

The **AMG4787A-DR-SF** receives and drops off a data signal transmitted from an **AMG4788A-DR-SF** receiver. It then inserts video and a data signal onto the outgoing optical signal. In normal operation the video and data signals are transmitted on the primary output and the data received from the primary input. The secondary optical input is independent and is regenerated on the secondary output.

At the **AMG4788A-DR-SF** receiver if the primary input signal is not present, the unit will shut down the secondary output to inform the **AMG4787A-DR-SF** that the primary signal route is not OK. The **AMG4787A-DR-SF** will then send out the video and data signals on its secondary output in the opposite direction. As the primary input at the **AMG4788A-DR-SF** is not present the data signal will now be taken from the secondary optical input, thus maintaining integrity of the data transmission.

Optical Connection

The AMG4788AR-DR-SF is connected as illustrated below when used with an AMG4787A-DR-SF 8-channel transmit unit acting as a point to point system.

Connections

Video Output Connections

-	
No. of channels	8
Connectors	
Output Impedance	
Output Level	
Frequency Response	10Hz to 7MHz.

Optical Connections

PRIMARY OPTO OUT

Connector	LC/PC
Primary Optical Launch Power	5dBm
Wavelength	1550nm
Secondary Optical Sensitivity	22dBm
Wavelength	1310nm

PRIMARY OPTO IN

Connector	.LC/PC
Primary Optical Sensitivity	22dBm
Wavelength	.1550nm
Secondary Optical Launch Power	5dBm
Wavelength	.1310nm

Power Connection

Power supply	from plug in connection on the AMG2009 / AMG2015 subrack
Power consumption	10 Watts max.

Data Channel Connections

Total No. of Data Channels8 channels

Data/Audio	Channels -	BANK A	8	channels
Data/Audio	Channels -	BANK B	N	ot Used

For the data or audio channels to be present, the appropriate data daughter boards have to be fitted into the data expansion board slots.

Data and Audio Channel Configuration

The AMG4788A-DR-SF and rackmount equivalent AMG4788AR-DR-SF sends and receives data in one bank - Bank B is not used. The physical interface is determined by the fitting of AMG data or audio daughter boards onto the appropriate data expansion board slots.

Data Interface Connections Channel A

RJ45 Pin		Channel A		Cat 5/6 Cable Colour Code T568B
No.	RS485 [switch high]	RS422 [switch mid]	RS232 [switch low]	
1		IN + (A)	GND	White/orange
2		IN - (B)	IN	Orange
3				White/green
4				Blue
5				White/blue
6				Green
7	IN/OUT + (A)	OUT + (A)	N/A	White/brown
8	IN/OUT - (B)	OUT - (B)	OUT	Brown

Note: (A) or (B) in brackets in above table refers to RS485 / RS422 data specification, not Channel A, Channel B.

Data Interface Daughter Board Options

The data interface daughter board options are as follows:

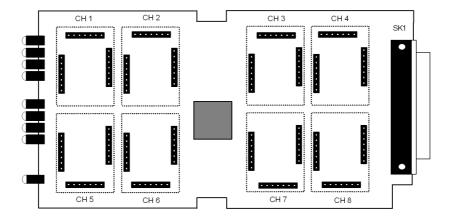

Option Code 'x'	Part No.	Description
0	X12542	4 Wire Audio Interface Daughter Board
1	X04057	RS422/485 Data Interface Daughter Board
2	X04049	RS232 Data Interface Daughter Board
3	X04058	20mA Current Loop Data Interface Daughter Board
4	X12579	TTL Data Interface Daughter Board
5	X12578	Contact Closure Data Interface Daughter Board
6	X13038	FTT10A Echelon Lonworks Data Interface Daughter Board

Data and Audio Channel Configuration

The data expansion board slots are accessed by removing the AMG unit from its case. A data channel is active when a daughter board is installed in the required data channel slot. Each data interface board enables one bi-directional channel.

Daughter Board Layout

The channel slots are as follows:

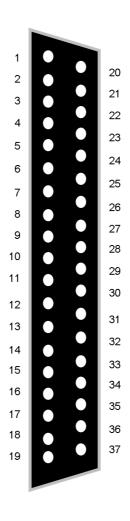

Data and Audio Daughter Board Fitting Instruction

The data and audio daughter boards pushed on to the pin headers mounted on the data expansion boards. Ensure that the connectors are lined up correctly and not offset before pushing firmly in place. Note that the data and audio channel numbers are associated with each slot. This allocates the pin numbers on the rear panel connector together with the front panel LED indicators.

Data and Audio Connections

The BANK A data/audio channels pin connections on the rear panel connectors are as follows:

Pin	Description	Bank
No.		
4	A 15 (D 1 OLIA IN ; (A)	_

Mounting Details

The unit is designed to be mounted within an AMG2009 or AMG2015 Subrack on standard card guides.

Removal / replacement from / to the Case

Note: - The AMG unit PCB's are static sensitive. Handle with proper care and use normal electrostatic discharge (ESD) procedures. Use properly grounded protection (for example, wrist straps) when handling the PCB.

To remove units from the case to access the data expansion boards and the daughter boards, remove the 2 or 4 fixing screws on the rear panel and slide the PCB's out of the case. Ensure that the fibres do not snag or get trapped.

To replace the PCB's into the case, slide the PCB's gently into the case aligning the boards with the appropriate slots. Ensure that the fibre do not snag or get trapped.

Safety

AMG Optical Fibre Products use Class 1 laser systems in accordance with EN 60825-2:2000.

It is always advisable to follow good practice when working with optical fibre systems. This includes:

- Do not stare with unprotected eyes or with any unapproved collimating device at fibre ends or connector faces, or point them at other people.
- Use only approved filtered or attenuating viewing aids

For other safety issues and advice on good practice associated with optical fibre systems, please see EN 60825-2:2000 or your local safety officer.

Maintenance and Repair

There are no user serviceable parts within AMG products. See unit data sheet for full specification.

In case of problem or failure, please call your local support centre or contact: **AMG Systems Ltd.** at 3 The Omega Centre, Stratton Business Park, Biggleswade, Beds., SG18 8QB, UK.
