

/ INTERFACE CONNECTIONS

- ① Insert the Cat5/6 cable into the RJ45 port.
- ② Ports 1-4 support IEEE802.3at PoE output (max 30W per port).
- ③ If a PD device is connected the respective PoE LED will turn on.

SCAN ME

/ PORT SPEEDS

Example part code:

AMG350-4**G**AT-1**G**-P75-PD

| Character | RJ45 Port Speed |
|-----------|-----------------------|
| F | 10/100 Base-T(X) |
| G | 10/100/1000 Base-T(X) |

/ POE CAPABILITIES

Example part code:

AMG350-4GAT-1G-**P75**-PD

| Characters | PoE Standard Supported | Characters | PoE Budget |
|------------|--------------------------|------------|------------|
| None | Non-PoE Port | P75 | 75W Max |
| AT | IEEE 802.3at 30W Port | | |
| BT | IEEE 802.3bt 60/90W Port | | |

Note: The maximum available PoE budget will be determined by the PSE source device used less the power consumption of the switch itself (4W) along with the distance of the switch from the PSE source (100m max).

IEEE 802.3at Models
Type 1 & 2 PoE support
Mode A PSE only

IEEE 802.3bt Models
Type 1, 2, 3 & 4 PoE support. Mode A and/or Mode B PSE

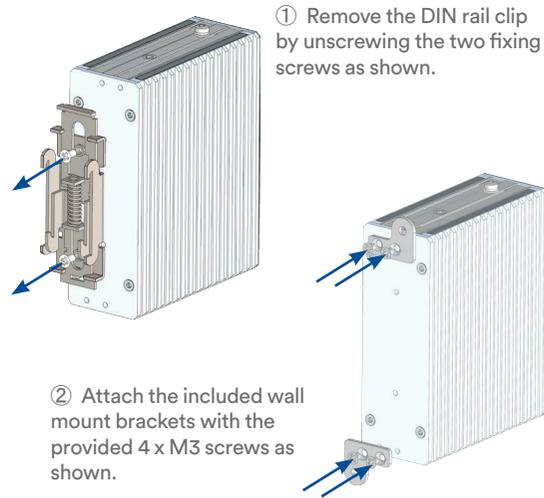

AMG350-4GAT-1G-P75-PD Industrial PoE Powered Switch

Installation Manual - Hardware

/ DIN RAIL MOUNT INSTALLATION

/ SURFACE MOUNT INSTALLATION

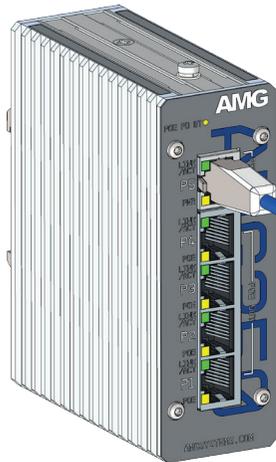

③ Fix the unit to the surface using two appropriate screws (screws not provided)

/ IP RATING

To maintain the units IP40 rating any screw holes that are not used should still have their screws installed as shown in green above.

/ POWER

The unit is powered by any IEEE802.3at or IEEE802.3bt PoE source (PSE) connected to Port 5 as shown.

If the PSE source is IEEE802.3at compliant then the yellow POE PD BT led will not be illuminated

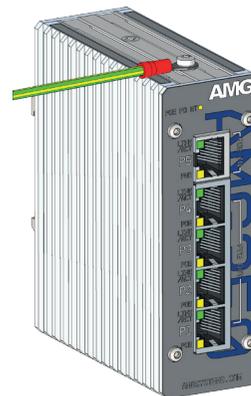

If the PSE source is IEEE802.3bt compliant then the yellow POE PD BT led will be illuminated.

In all cases the PWR LED located on Port 5 will be illuminated once any PoE power is received and the PoE negotiation has been established.

| Model Type | Power |
|------------|---------|
| PD Model | 4W Max* |

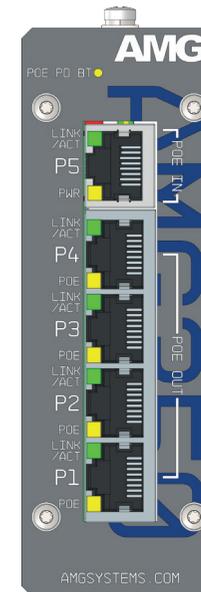

*Excludes PoE Load

/ EARTH PROTECTION

To provide correct protection from ESD and Surge events ensure that the unit is correctly earthed using the provided earth connection point in accordance with local electrical codes & standards. (cable not provided)

/ LED INDICATORS

| LED | Colour | Description |
|---------------|--------|--|
| POE PD BT | Off | No 802.3bt PSE Detected |
| | Yellow | 802.3bt PSE Detected |
| PWR | Off | Unit Not Powered |
| | Yellow | Unit Powered |
| RJ45 LINK/ACT | Off | No Ethernet link connection |
| | Green | Ethernet link present (flashes with data traffic activity) |
| POE | Off | No PoE being supplied |
| | Yellow | PoE is being delivered on the RJ45 port |
